

# First panoramic gondola lift in Italy

Only recently, Bartholet Ropeways was given the go-ahead to build the first “Design by Porsche Design Studio” panoramic gondola lift in Italy. The 8-passenger gondola lift in San Domenico will be built next year. Bartholet Ropeways is due to start construction work in July 2017.

The gondola tramway with a length of just under 1.5 km has 2 sections and runs from San Domenico to the Alpe Ciamporino. The first section of the new installation follows a new route, while the second section replaces an existing system.

This is the second Porsche Design ropeway in San Domenico. In 2014, Bartholet Ropeways built a 6-passenger chair lift also with “Design by Porsche Design Studio”.
