

Second chinese Bartholet installation in operation – Thaiwoo

In the fast-growing Chinese ski resort of Thaiwoo, Bartholet built a new 6-seater chairlift during a planning and construction period of only 8 months. In the future, a high-speed train will serve as a direct feeder from the big city of Beijing to Thaiwoo, bringing even more tourists from Beijing. The chairlift with 2 sections went into operation at the beginning of 2019 and has a capacity of 2400 passengers per hour. The chair seats with the "Design by Porsche Design Studio" are equipped with eye-catching, modern and comfortable seat cushions and are an eye-catcher in the snow-covered winter environment.

Technical data CLD6 Thaiwoo:

- Type of lift: 6-seater chairlift
- Height valley station: 1657 m. a.s.l.
- Top station height: 1789 m. a.s.l.
